

ALIGN HCM BRAND SYSTEM

# Claude Code Quick Start

Install once. Invoke whenever exact Align output is required.

---

ORGANIZATION EDITION | AUGUST 2026

FOR INTERNAL USE

## CLAUDE CODE ORGANIZATION GUIDE

---

# What Claude Gets Right Every Time

The plugin carries the approved assets, exact deck reference, surface tokens, and validation rules with it.

## Exact Align deck system

Starts from the bundled privacy-scrubbed master. Preserves the approved geometry, navy, orange, typography, footer rhythm, and Align artwork.

## Verified client co-branding

Resolves the client from the current brief, uses a verified logo, preserves its aspect ratio, and places it in the approved cover zone.

## Surface-specific brand rules

Routes decks, documents, web, editorial, social, and motion work to the correct palette and production guidance.

## Validation before delivery

Checks the exact Align logo, client logo fidelity, placeholders, colors, geometry, contrast, overflow, and final rendered output.

# Install It in Claude Code

The marketplace is live. Use managed settings for organization rollout or the commands below as a manual fallback.

## 1 Add the marketplace

```
/plugin marketplace add  
https://github.com/dillonmohr8777/  
claude-skills-repo.git
```

## 2 Install the plugin

```
/plugin install alignhcm-brand-system@alignhcm-tools
```

## 3 Reload Claude Code

```
/reload-plugins
```

## 4 Confirm availability

Type / and search for:  
alignhcm-brand-system

# Invoke the Skill Directly

Add the job after the command. Attach the current brief, approved source material, and client logo when available.

**/alignhcm-brand-system:  
alignhcm-brand-system**

**The direct Claude Code command**

Example: Create an Align HCM proposal deck for Northwind using the attached brief and verified logo. Return PPTX and PDF.

**Claude can also load it automatically**

Ask for an Align HCM or SmartCare deck, proposal, report, one-pager, HubSpot page, social graphic, carousel, video, or brand review. Direct invocation is best when brand fidelity is critical.

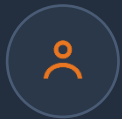

**Always provide current source material**

Claude will not guess the client, reuse sample pricing, redraw a logo, or carry old engagement facts forward. If identity, provenance, or approved copy is ambiguous, the skill stops before production.

# Claude's Delivery Gate

A valid invocation produces reviewable work, not a generic template or an unverified brand approximation.

## 1 Resolve the assignment

Claude states the client, engagement, audience, output surface, date, and source evidence before production.

## 2 Use approved assets

The exact Align artwork stays unchanged. Client logos come from an attached approved asset, canonical project folder, official brand kit, or official website.

## 3 Build in the right system

Decks clone designed slides. Other surfaces use their own approved palette, typography, layout, imagery, and copy rules.

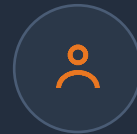

## 4 Validate the final file

Claude runs the surface linter, checks the editable source, renders the output, and reviews logo fidelity, contrast, overflow, and sample residue.

READY TO USE

## Start with a clear brief.

`/alignhcm-brand-system:alignhcm-brand-system`

Invoke the approved Claude skill

[github.com/dillonmohr8777/claude-skills-repo/pull/22](https://github.com/dillonmohr8777/claude-skills-repo/pull/22)

Attach the brief, source material, and verified client logo
